Summary

As an experienced developer with a passion for innovation and a dedication to delivering exceptional user experiences, I have spent the past 4 years creating cutting-edge web-based solutions using JavaScript, Node.js, React.js and Typescript. I specialize in developing robust APIs with the RESTful concept, ensuring that my applications are reliable, scalable, and efficient. For example, I recently developed a RESTful API for a client that integrated with their existing systems and improved data accessibility, resulting in a 25% increase in user engagement. My primary goal as a developer is to leverage the most cutting-edge technologies to create state-of-the-art solutions that deliver exceptional value to users and clients alike.

Experience

Full Stack Developer (Freelance)
Hyvetech Limited - www.hyvetech.co | Jan 2023 - Present

AutoHyve:

- I developed and integrated APIs for managing expenses into the expenses management tab, enabling workshops to add, edit, view, and delete expenses. These features facilitated bookkeeping and expense tracking, resulting in a 30% increase in workshop profits.
- Seamlessly integrated existing APIs into the customer app, this enabled users to effortlessly view estimates, invoices, and make payments on the go. This improved the user engagement by 25%.
- I optimized the workshop app to be fully responsive, allowing workshops to perform all tasks on their mobile phones through a user-friendly interface. This resulted in a 70% improvement in user experience and app performance.
- I developed the item and stock management feature for workshops, which allows for the management of inventory and item quantities. This feature not only enables workshops to add new items and suggests them while creating estimates, but also includes APIs that handle CRUD operations for items and stock. As a result, this streamlined the inventory management process and improved item accuracy by 60%.
- I revamped the super admin dashboard to manage analytics by incorporating charts and boxes, and created an API that enables data filtering based on date ranges. This modification resulted in a 40% improvement in data analysis for the super admin.

HyvePay:

- I developed and implemented a secure and scalable API for bulk transactions from a partner virtual account to multiple accounts, this enhanced transaction efficiency within the application.
- Designed and seamlessly integrated the user-friendly front-end interface, enabling users to initiate and manage multiple transactions effortlessly through the API, resulting in a streamlined and efficient transaction experience within the application.
- Developed a versatile API empowering the super admin to efficiently disable and enable user bank accounts, while also taking charge of designing and implementing the user-friendly UI for seamless management of these actions within the application.
- Implemented comprehensive functionality within the admin user dashboard, enabling the efficient retrieval and tracking of all virtual accounts, their transactions, and complete transaction logs, facilitating seamless monitoring and management of virtual accounts

Full Stack Developer (Contract)
A'Mobi LTD | June 2021 – Dec 2022 (1 year 11 months)

Esun-Ekiti:
- As the sole developer, I designed, developed, and maintained this web application that significantly enhanced the user experience for visitors and tourists. The application was built using React and Node.js, and included key features such as user authentication and a news feed. By leveraging my front-end development expertise, I was able to deliver a responsive and engaging product that received positive feedback from users.
- Configured and deployed web servers on AWS, such as Amazon Elastic Compute Cloud (EC2) instances, allowed for scalable and reliable hosting of web applications. This resulted in improved availability and performance of the applications, as well as reduced infrastructure costs for the organization.
- Developed effective APIs using RESTful concepts resulted in improved communication and data transfer leading to seamless integration and enhanced functionality

KweekBuy:
- As part of a team of three developers, I leveraged my front-end development expertise to design and implement a product that improved customer engagement and experience by 40%. My contributions included utilizing HTML, CSS, JavaScript, and Bootstrap to enhance the development of the application. This resulted in increased customer satisfaction and positive feedback.
- Built features and applications with a mobile responsive design, resulting in an optimal user experience on various devices and improved accessibility for users by 30%.
- Optimize application performance by identifying and addressing bottlenecks and improving scalability, resulting in faster load times, smoother user experiences, and the ability to handle more users and data.

Intern (Full Stack Development)
A'Mobi LTD | Nov 2019 - Mar 2021 (1 year 5 months)

- Assisted in the development of new features and provided support in troubleshooting and debugging, resulting in improved application performance.
- Collaborated with cross-functional teams consisting of developers, designers, and project managers to create software solutions that fully met client requirements. Maintained regular communication with team members to ensure seamless coordination and timely delivery. Achieved high levels of client satisfaction through a commitment to quality and customer service.
- Participated in code reviews and provided constructive feedback to both fellow developers and senior team members, resulting in a higher quality codebase and better overall application performance.

Education
University of Maiduguri
  Bachelor of Library and Information Science, Library and Information Science 2011 - 2015

Licenses & Certification

React: Creating and Hosting a Full-Stack Site – LinkedIn   **Learning REST APIs** – LinkedIn
Become a React Developer - LinkedIn   **SEO Foundation -** LinkedIn
Web Development - Datanet Stracon, Abuja Nigeria

Skills
JavaScript • Node.js • ExpressJs • Fastify • React.js • React-Native • Redux • PostgreSQL • MongoDB • Representational State Transfer (REST) • Sequelize • Amazon Web Services (AWS) • TypeScript • ThreeJs • Redis • RabbitMQ
