PROFESSIONAL SUMMARY

Full Stack Software Developer with 5+ years of experience designing and delivering secure, scalable web and cloud-based systems across product- and service-oriented environments. Strong background in building and maintaining RESTful APIs, working with relational databases, and developing responsive, user-facing interfaces using React and modern JavaScript frameworks. Experienced collaborating within small, cross-functional teams, writing clean, testable, and maintainable code, and improving system reliability through thoughtful engineering, automation, and CI/CD practices. Curious and adaptable engineer with hands-on experience applying AI-assisted features and tools to enhance product capabilities, performance, and development efficiency.

EXPERIENCE

Full Stack Developer (Part-time)

May 2025 - Present

Le Fortifier Corp, Calgary, AB, Canada

- Developed and shipped backend and frontend features for a client-facing SaaS platform using JavaScript frameworks and REST APIs to support core business workflows.
- Collaborated cross-functionally with product and design partners to scope features, align on requirements, and deliver work incrementally across multiple releases.
- Broke down features into well-defined milestones, proactively communicating progress, risks, and blockers to ensure timely delivery.
- Worked within Git-based workflows and CI/CD pipelines to maintain reliable deployments and consistent release quality.

Technologies: NodeJS, ReactJS, NextJS, ExpressJS, MongoDB, CI/CD, Git Action, Typescript

CTO / Full Stack Developer (Part-time)

Aug 2025 - Present

TalkSharp, Bristol, UK

- Led custom full-stack development of an enterprise-grade language learning platform, owning React-based frontend features and backend APIs.
- Designed and implemented backend authentication and data-processing APIs using Firebase Cloud Functions to support secure user onboarding and identity workflows.
- Developed AI features, including an LLM-integrated conversational chatbot, to enable interactive language learning experiences.
- Owned engineering outcomes end-to-end, from technical planning and implementation to deployment and iteration based on user feedback.
- Implemented CI/CD pipelines with GitHub Actions, improving build reliability and deployment speed.

Technologies: Firebase Function, ReactJS, Typescript, Jotai, LLM Integration, Capacitor, CRM integrations, Google Workspace, CI/CD, Git Action

Founder / Full Stack Developer

Feb 2025 - Present

MobaTech, Abuja, Nigeria

- Designed and launched a data- and machine-learning-driven platform that predicts next-day user stress levels to deliver personalized insights.
- Developed Python-based and Go backend services and RESTful APIs (FastAPI, Flask) to serve analytics, ML inference, and prediction results to client applications.
- Implemented RAG-style workflows combining structured user data with LLM prompts to improve insight relevance and quality.
- Architected modular systems across multiple components (ML models, APIs, databases, frontend) to support scalability and maintainability.
- Established coding standards, reusable components, and shared templates to improve productivity and code quality.

Technologies: Python, Go, FastAPI, Flask, Docker, Kubernetes, PostgreSQL, Microservices Architecture, ML inference (Scikit-Learn), LLM integration via OpenAI-compatible APIs (DeepSeek via OpenRouter), React Native, Vue.js

Senior Software Developer

Jan 2024 - Jan 2025

Devsquarepk, Munich, Germany

- Developed and integrated backend APIs for a SaaS/B2B restaurant platform, enabling restaurant onboarding, menu management, and customer order workflows across multiple frontend applications.
- Collaborated in an agile, distributed team, participating in sprint planning, design discussions, and code reviews.
- Delivered complex features independently while coordinating with teammates, balancing quality, timelines, and business needs.

- Mentored a junior developer, providing feedback through code reviews to support skill development and team growth.

Technologies: JavaScript, Typescript, NodeJS, ReactJS, NextJS, ExpressJS, MongoDB, AWS (EC2), Jotai, MongoDB, OpenAI, Docker

Full Stack Developer

Jan 2023 - Dec 2024

Hyvetech Ltd, Abuja, Nigeria

- Built and integrated backend APIs for a SaaS/B2B workshop management platform supporting estimates, invoicing, inventory, expense tracking, and analytics across multiple frontends.
- Developed and integrated secure backend APIs for a fintech platform embedded within the Autohyve system, enabling seamless in-app payments and financial operations across web and mobile clients for automotive businesses and individuals.
- Led the end-to-end migration of Autohyve's infrastructure and codebase to a new AWS account, ensuring secure configuration, data integrity, and seamless application functionality.

Technologies: JavaScript, Typescript, NodeJS, ReactJS, NextJS, ExpressJS, MongoDB, PostgreSQL, Redux, AWS (EC2, S3)

SKILLS

Python, JavaScript, Go, React, NextJS, VueJS, REST APIs, FastAPI, Flask, Django, Node.js, [Express.js](#), AWS, Firebase, Docker, Kubernetes, CI/CD, PSQL, MongoDB, Agile development, API design, monitoring, debugging, code reviews.

EDUCATION

Bachelor of Science (B.Sc.) Library and Information Science

Jan 2016

University of Maiduguri, Borno State, Nigeria

CERTIFICATIONS

- **Kubernetes and Cloud Native Associate** – The Linux Foundation (Oct 2025)
- **AWS Educate Machine Learning Foundations** – AWS (Jun 2025)
- **Master Machine Learning in Python with Scikit-Learn** – Udemy (Jan 2025)
