PROFESSIONAL SUMMARY - SOFTWARE ENGINEER

Full Stack Software Developer with 5+ years of experience solving complex engineering challenges by building secure, scalable web and cloud-based systems. Skilled at identifying inefficiencies, breaking down ambiguous problems, and delivering high-impact solutions across backend APIs, databases, and React-based user interfaces. Experienced in collaborating within cross-functional teams to ship reliable, maintainable code while improving system performance through automation, CI/CD, and thoughtful engineering. Leverages AI-assisted tools and LLM-driven features to optimize workflows and enhance product capabilities.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, Go, TypeScript.
- **Frontend:** React, NextJS, VueJS, Redux, Jotai, React Query, Responsive Design.
- **Backend:** Node, Express, FastAPI, Flask, Django, RESTful APIs, GraphQL, MongoDB, PostgreSQL.
- **Cloud & Tools:** AWS (EC2, S3), Firebase Functions, Docker, Kubernetes, CI/CD (GitHub Actions).
- **Methodologies:** Agile/Scrum, Code Reviews, Mentorship, TDD.

PROFESSIONAL EXPERIENCE

Lead Full Stack Engineer
TalkSharp, Bristol, UK

May 2025 - Present

- Led end-to-end development of an enterprise-grade language learning platform, building scalable React-based frontend features and backend APIs to support real-time, interactive user experiences.
- Designed and implemented Firebase Cloud Functions-based backend services, enabling secure authentication, user onboarding, and identity workflows while ensuring reliable data processing at scale.
- Integrated AI-powered features, including an LLM-driven conversational chatbot, enhance user engagement through real-time, context-aware language practice.
- Mentored and guided developers through code reviews, architecture decisions, and best practices, improving code quality, consistency, and overall team velocity.
- Streamlined fragmented deployment processes by implementing CI/CD pipelines with GitHub Actions, reducing manual errors and improving release reliability.
- Architected and developed a mobile-first kids' learning experience, optimizing UI/UX for engagement and accessibility across devices.

Technologies: Firebase Function, ReactJS, React-Native, Typescript, Jotai, LLM Integration, Capacitor, CRM integrations, Google Workspace, CI/CD, Git Action, React Query

Lead Full Stack Developer
Moba Labs, Abuja, Nigeria

Feb 2025 - Oct 2025

- Designed and launched an AI-powered stress prediction platform, addressing the challenge of inconsistent mental health tracking by delivering personalized, data-driven next-day insights.
- Built an initial monolithic backend using Django and PostgreSQL, rapidly enabling ML inference and core workflows, then identified scaling and performance limitations as system usage grew.
- Re-architected the system into a distributed microservices architecture using Python (FastAPI, Flask) and Go, resolving performance bottlenecks and improving scalability and service reliability.
- Implemented RAG-style pipelines combining structured user data with LLM outputs, improving the relevance and contextual accuracy of insights compared to static rule-based approaches.
- Designed modular system components across ML models, APIs, and databases, reducing system complexity and enabling easier iteration and feature expansion.
- Established engineering standards and reusable components, reducing development inconsistencies and improving team productivity and onboarding speed.

Technologies: Python, Go, FastAPI, Flask, Django, DRF, Docker, Kubernetes, PostgreSQL, Microservices Architecture, ML inference (Scikit-Learn), React Query, LLM integration via OpenAI-compatible APIs (DeepSeek via OpenRouter), React Native, Vue.js

Senior Software Developer
Devsquarepk, Munich, Germany

Jan 2024 - Jan 2025

- Developed and integrated backend APIs for a SaaS/B2B restaurant platform, addressing fragmented operations by enabling seamless restaurant onboarding, menu management, and order workflows across multiple frontend applications.
- Collaborated within an agile, distributed team, contributing to sprint planning, system design discussions, and code reviews to align technical solutions with evolving product and business requirements.
- Delivered complex features end-to-end in a fast-paced environment, balancing competing priorities and resolving integration challenges while maintaining code quality and meeting tight deadlines.
- Engineered AI-driven features using OpenAI API, automating marketing workflows and solving content-generation bottlenecks by enabling restaurants to generate optimized menu descriptions, relevant hashtags, and sentiment-based customer insights.
- Identified skill gaps and onboarding challenges for junior team members, mentoring a developer through structured code reviews and guidance, improving code quality and team efficiency.

Technologies: JavaScript, Typescript, Node.js, React.js, React Query, Next.js, Express.js, MongoDB, AWS (EC2), Jotai, MongoDB, OpenAI, Docker

Full Stack Developer
Hyvetech Ltd, Abuja, Nigeria

Jan 2023 - Dec 2024

- Built full-stack applications using React, Next.js, Node.js, and Django, addressing fragmented workshop operations by delivering end-to-end features for estimates, invoicing, inventory, expense tracking, and analytics across multiple frontend applications.
- Developed and integrated secure backend APIs for a fintech platform within the Hyvetech ecosystem, solving inefficiencies in manual financial processes by enabling seamless in-app payments and financial operations for automotive businesses and individual users.
- Improved cross-device usability by designing and implementing responsive React and Next.js interfaces, enhancing accessibility and consistency across mobile and desktop experiences.
- Designed and optimized PostgreSQL and MongoDB schemas, resolving data consistency and scalability challenges while supporting complex business workflows and high-volume transactions.
- Led the end-to-end migration of infrastructure and codebase to AWS, addressing scalability and reliability limitations by implementing secure configurations, ensuring data integrity, and enabling seamless system performance in production environments.

Technologies: JavaScript, Python, Django, DRF, Typescript, Node.js, React.js, Next.js, Express.js, MongoDB, PostgreSQL, Redux, AWS (EC2, S3)

VOLUNTEER EXPERIENCE

Website Designer
Canada Confesses, Calgary, AB

Feb 2026 - Present

- Maintain website functionality, performance, and accessibility using Wix platform tools.
- Participate in efforts to enhance user engagement through interactive elements and user-friendly navigation.
- Collaborate with the Website Director and Website Lead to keep the website content up-to-date with relevant information.
- Provide input to improve the website's visual appeal and engagement strategies.
- Collaborated on UX improvements and engagement-focused enhancements.
- Assist the Website Team in swiftly addressing minor website issues to uphold a seamless user experience.

EDUCATION

Bachelor of Library and Information Technology, 2016
University of Maiduguri, Borno State, Nigeria

CERTIFICATIONS

- **Kubernetes and Cloud Native Associate** – The Linux Foundation (Oct 2025)
- **AWS Educate Machine Learning Foundations** – AWS (Jun 2025)
- **Master Machine Learning in Python with Scikit-Learn** – Udemy (Jan 2025)
- **Micro-Certification - Welcome to ServiceNow** – ServiceNow (Jan 2026)
